

## Aluminum High Capacity Single Point Load Cell

Model 1250 is a single point load cell designed for direct mounting of large platforms.

The product is a cost-effective load cell for use on counting, weighing, bench or floor scale products.

This high accuracy load cell is approved to OIML R60, NTEP and other stringent approval standards. Suitable for use in hazardous environments, these load cells can be provided with European approval to EEx ia IIC T4 and are FM approved to class I, II, III, Division I.

### FEATURES

- Capacities 50 - 1000 kg
- Aluminum construction
- Single point 600 x 600 mm platform
- OIML R60 and NTEP approved
- Hazardous area approved to FM & EEx ia IIC T4
- IP67 Option available
- Available with metric or UNC threads

A special humidity-resistant protective coating assures long-term stability over the entire compensated temperature range.

The two additional sense wires, sample the bridge supply voltage at the load cell. Complete compensation of change on the lead wires resistance, due to temperature change and/or cable extension, is achieved by feeding this voltage into the appropriate electronics.
