## Aluminum High Capacity Single Point Load Cell

Model 1260 is a high performance, high capacity single point load cell designed for direct mounting of large platforms.

The rugged construction offers high immunity to side forces making it suitable for a wide range of weighing applications, including bench scales and check weighing.

A special humidity resistant protective coating assures long term stability over the entire compensated temperature

### FEATURES

- Capacities 30-635 kg
- Aluminum construction
- Single point 600 x 600 mm
- OIML R60 and NTEP approved
- Hazardous area approved to FM EEx ia IIC T4
- IP66 protection
- Available with metric or UNC threads

range. For hazardous environments this load cell has an EEx is IIC T4 level of approval.

The two additional sense wires feed back the voltage reaching the load cell. Complete compensation of changes in lead resistance due to temperature change and/or cable extension, is achieved by feeding this voltage into appropriate electronics.

### SPECIFICATION

| GRADE   | E  | C3**   | UNITS                            |
|---|--|--------|----------------------------------|
| <b>Rated Capacities</b>                         | 30**, 50, 75, 100, 200, 250, 300, 500, 635                             |        | kg                               |
| <b>Rated Output</b>                             | 2.0 ± 10%  |        | mV/V                             |
| <b>Total Error*</b>                             | 0.030  | 0.020  | ± % of rated output              |
| <b>Zero Return after 30 mins</b>                | 0.050  | 0.017  | ± % of applied load              |
| <b>Temperature Effect: On Output</b>            | 0.0030   | 0.0010 | ± % of applied load/°C           |
| <b>On Zero</b>                                  | 0.0100   | 0.0023 | ± % of rated output/°C           |
| <b>Eccentric Loading</b>                        | 0.005  | 0.0033 | ± % of applied load/cm           |
| <b>Zero Balance</b>                             | 10.0   |        | ± % of rated output              |
| <b>Temperature Range: Operating Compensated</b> | - 30 to + 70<br>- 10 to + 40   |        | °C                               |
| <b>Safe Overload</b>                            | 150  |        | ± % of rated capacity            |
| <b>Ultimate Overload</b>                        | 250  |        | ± % of rated capacity            |
| <b>Excitation: Recommended Maximum</b>          | 10<br>15   |        | Volts AC or DC<br>Volts AC or DC |
| <b>Input Impedance</b>                          | 415 ± 15   |        | Ohms                             |
| <b>Output Impedance</b>                         | 350 ± 3  |        | Ohms                             |
| <b>Insulation Impedance</b>                     | > 2000   |        | MegaOhms                         |
| <b>Deflection at Rated Capacity</b>             | < 0.4  |        | mm                               |
| <b>Weight: All Types</b>                        | 1.9  |        | kg                               |
| <b>Construction</b>                             | Anodized Aluminum (Aluminum option)                                    |        |                                  |
| <b>Environmental Protection</b>                 | IP66   |        |                                  |
| <b>Cable</b>                                    | 3 Meters (Standard), 6 Wire, Polyurethane Jacket, Dual Floating Screen |        |                                  |
| <b>Platform</b>                                 | 600 x 600  |        |                                  |

\*Total Error - According to OIML R60

\*\*30kg Capacity not approved

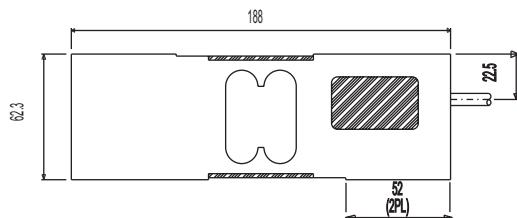

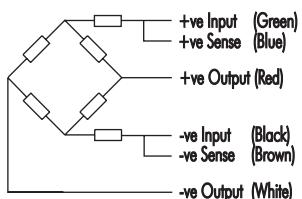

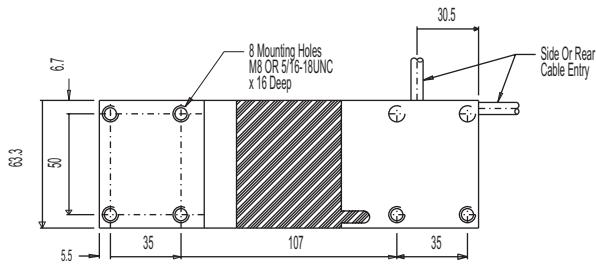

\*\*\*Standard 50% utilization, other utilization factors available

Torque: 16 Nm
